

Update

07/13/2026

Shek Hong
Perseus
Chan

Recap

1. Study phrase difference by changing time offsets to get the right energy graph
2. Adding rotated absorbers in g4bl
3. Customize beam inputs
4. Running g4bl in python
5. Going to ORNL

Result

- Have not completed 1-4 yet

Challenge

- Unable to run g4bl again
- Running g4bl and Jupyter lab together in Docker

Method

- AI (Grok) without understanding (Failure)

Possible solutions

- Docker-Compose
- Lab's MacBook
- Virtual Machine

Next Steps

- Study how to use Docker-Compose properly without AI
- To run g4bl and Jupyter Lab
- Continue the unfinished studies above
